

## KITSAP PUBLIC HEALTH BOARD - AGENDA

March 6, 2018

1:45 p.m. to 3:00 p.m.

Norm Dicks Government Center, First Floor Chambers  
Bremerton, Washington

- 1:45 p.m. 1. Call to Order  
*Mayor Becky Erickson, Chair*
- 1:46 p.m. 2. Review and Approval of Agenda  
*Mayor Becky Erickson, Chair*
- 1:47 p.m. 3. Approval of February 6, 2018 Meeting Minutes  
*Mayor Becky Erickson, Chair*
- 1:50 p.m. 4. Approval of Consent Items and Contract Updates: See Warrant and EFT  
Registers and Contracts Signed Report  
*Mayor Becky Erickson, Chair*
- 1:55 p.m. 5. Public Comment  
*Mayor Becky Erickson, Chair*
- 2:05 p.m. 6. Health Officer and Administrator Reports  
*Dr. Susan Turner and Keith Grellner*

### DISCUSSION / INFORMATION ITEMS

- 2:10 p.m. 7. Nurse Family Partnership  
*Katie Eilers, Community Health Division Director*  
*Nancy Acosta, Nurse Family Partnership Program Supervisor*
- 2:40 p.m. 8. Solid & Hazardous Waste Program  
*Jan Brower, Solid & Hazardous Waste Program Manager*
- 3:00 p.m. 9. Adjourn

**KITSAP PUBLIC HEALTH BOARD  
MEETING MINUTES  
Regular Meeting  
February 6, 2018**

The meeting was called to order by Board Chair, Mayor Becky Erickson at 1:46 p.m.

**REVIEW AND APPROVE AGENDA**

There were no changes to the agenda.

**BOARD MEETING MINUTES**

Commissioner Rob Gelder moved and Commissioner Charlotte Garrido seconded the motion to approve the minutes for the January 2, 2018, regular meeting. Mayor Kol Medina abstained. The motion was approved unanimously.

**CONSENT AGENDA**

The February consent agenda included the following contracts:

- 1516 Amendment 2 (1787), *WA State Department of Ecology, Hood Canal Regional Septic Loan Program*
- 1756, *Kitsap Mental Health Services, Kitsap Connect*
- 1762, *Spectra Labs, Kitsap LLC, PIC Lab Analysis*
- 1790, *Washington State Association of Local Public Health Officials, Medicaid Match*

Commissioner Garrido moved and Mayor Rob Putaansuu seconded the motion to approve the consent agenda, including the Contracts Update and Warrant and Electronic Funds Transfer Registers. The motion was approved unanimously.

**PUBLIC COMMENT**

There was no public comment.

**HEALTH OFFICER/ADMINISTRATOR'S REPORT**

Health Officer Update:

Dr. Susan Turner, Health Officer, informed the Board that Keith Grellner, Administrator, was attending the Leader-to-Leader meeting, but noted that his Administrator's Report was included in their Board packets.

Next, Dr. Turner provided the Board with an update on the NW Family Medical Residency program. She explained that the Residency will begin accepting residents in July of 2018 and is completing recruitment efforts this week. Additionally, the Health District has been working with the Residency to develop public health training and experiences for the residents that also includes visiting community organizations, such as food banks.

Mayor Greg Wheeler asked if this was the program CHI Franciscan/Harrison Medical Center was developing. Dr. Turner confirmed that this is the same program.

Next, Dr. Turner provided the Board with an update on influenza in Kitsap County. She explained that there is a lot of flu testing occurring in urgent cares and emergency departments. She said this year's flu trends appear to be similar to last year's. There have been nine flu-related deaths, and nine flu outbreaks in long term care facilities, in Kitsap County. She said there is also an elevated number of positive tests for respiratory syncytial virus (RSV), which aligns with the state's data. She noted that, even if flu season is at its peak, there are still other viruses circulating and to continue precautionary measures such as washing hands and covering your mouth when coughing.

Mayor Erickson said, from her perspective, this flu season seems worse than usual and asked Dr. Turner what her feelings are on the matter. Dr. Turner said that she agrees that she is seeing a lot of sick people as well, however the trends are very similar to last year.

Commissioner Gelder added that it may be that more people are self-diagnosing and staying home rather than going into the emergency department, and therefore their cases are unreported. Dr. Turner agreed and said that aligns with the Department of Health messaging about how to care for yourself and your family when you have the flu, and urging people to stay home if their symptoms are not severe. This reduces the overuse of emergency departments.

There was no further comment.

#### **RESOLUTION 2018-01, APPROVING UPDATES TO KITSAP PUBLIC HEALTH BOARD BYLAWS.**

Dr. Turner reminded the Board that Health District staff had presented a draft of updated Board bylaws at the January meeting. She said Commissioner Garrido had asked staff to further clarify the Health Officer and Administrator roles and bring back a new draft. Dr. Turner explained that she and Mr. Grellner worked with Commissioner Garrido to draft updated bylaws for the Board's consideration.

Commissioner Garrido commented that, as the person who requested the changes, she was pleased with the new version of the bylaws and is ready to make a motion for approval.

Commissioner Garrido moved and Commissioner Gelder seconded the motion to approve Resolution 2018-01, Approving Updates to Kitsap Public Health Board Bylaws. The motion was passed unanimously.

There was no further comment.

#### **2017 WATER QUALITY REPORT PRESENTATION**

Mr. John Kiess, Environmental Health Director, approached the Board regarding the 2017 Water Quality Report. He introduced Grant Holdcroft, new Program Manager of the Pollution Identification and Correction Program (PIC), who has worked for the Health District since 1996. He also introduced the PIC staff and thanked them for their vital work.

Mr. Kiess provided an overview of the PIC program and gave a presentation about the 2017 Water Quality Report. Each year, the Health District's PIC program releases an annual report summarizing the previous year's water quality monitoring and clean-up work results. The 2017 Annual Water Quality Report has recently been completed and will be publicly released after this Board meeting. The report introduction with links to each watershed segment, is available on the Health District's website at:  
[www.kitsappublichealth.org/environment/files/reports/2017/Intro.pdf](http://www.kitsappublichealth.org/environment/files/reports/2017/Intro.pdf).

He said that the report is quite lengthy and very large in size, so a hard copy of the report was not included in the Board packet.

Most of the Health District's water quality monitoring and clean-up work is funded through Clean Water Kitsap, Kitsap County's storm water utility, along with periodic supplemental funds through temporary federal and state grants. Recently, the City of Poulsbo has partnered with the District to perform some monitoring (streams and storm water outfalls) work in the Liberty Bay watershed area by the City.

He said the notable findings of the 2017 Annual Water Quality Report include, but were not limited to, the following:

- Fecal bacteria levels were reduced or held stationary in 60% of targeted water bodies;
- 61 of 66 (92%) streams had an improving or stationary long term statistical trend;
- 56 of 62 (90%) marine water stations met standards;
- 21 of 66 (32%) stream monitoring stations met standards; and
- The number of streams with Public Health Advisories due to extremely elevated fecal coliform bacteria (FC) levels during summer months was unchanged from 2016 (5 streams).

Commissioner Gelder noted the Health District would discontinue its marine water monitoring in 2018, but asked if the state still monitors it. Mr. Kiess confirmed this and said the Washington State Department of Health monitors the water quality in any approved shellfish area.

Mayor Erickson asked if Mr. Kiess could speculate about the pollution in Lofall Creek. Mr. Kiess said the Health District speculates the cause of pollution to be wildlife, because staff have visited every property, tested every septic system around Lofall Creek and have been unable to identify a human source of pollution.

Mayor Medina asked if the Health District PIC program partners with the Bainbridge Island program. Mr. Kiess said that they currently do not partner on any work, and the Health District's PIC program is funded by Clean Water Kitsap which focuses on the unincorporated areas of Kitsap County. He also noted that the Health District will contract work with the cities

individually when there is a need. Additionally, Mayor Medina asked if Mr. Kiess felt that the Bainbridge Island water program was valuable. Mr. Kiess said that he did not know enough details about Bainbridge's program to have an opinion, but that assessing water quality is an important function of public health and is valuable to the community.

Commissioner Ed Wolfe asked for Mr. Kiess' best guess as to why there are fewer streams meeting standards in 2017 than in 2016. Mr. Kiess said he first suspected it was a record rainfall year, which can cause pollutants to run into the water. However, he said staff did a data analysis and found that there was not a significantly larger amount of rainfall in 2017. He explained that bacteria are wildly unpredictable and levels can vary over the span of a few minutes.

Commissioner Gelder asked what level of coordination and accountability the Health District has with other entities during pollution events such as sewage spills. He noted two recent spills at the local navy bases. Mr. Kiess said the Health District has a good relationship with the Navy, and said they typically report spills to the Health District in a timely fashion to allow time for public notification. He also said the Health District has good relationships with most sewage purveyors who call the Health District 24/7 to report an incident and coordinate a response. Commissioner Gelder added that there seems to be a lot of ambiguity about source and volume in some sewage spill announcements. Mr. Kiess agreed and said it can be difficult to get all the details from a large agency.

Commissioner Gelder noted the ability to identify sources of contamination are dependent on the types of testing available. He asked what additional tools might be needed for better testing and what the associated costs might be. Mr. Kiess said the Environmental Protection Agency (EPA) has sponsored a microbial source tracking sampling source program without charge for the Health District for the past few years. He also said the Health District has a partnership with the University of Washington, to identify emerging chemicals of concern, such as caffeine, that only a human would digest, for a couple hundred dollars per sample. He explained that the Health District is evaluating these tools over time to see if they are beneficial and there is a good return on investment.

Mayor Erickson commented that she was pleased to hear the Health District is conducting microbial source tracking. She asked if this method has been used at Lofall Creek. Mr. Kiess confirmed that the Health District is in the midst of a sampling regime at Lofall right now, and is applying this method to streams with higher pollution levels. Additionally, Mayor Erickson commented that there are a few areas of standing water that attract birds and overflow during heavy rainfall.

Commissioner Gelder asked if the sampling over time includes large storm events. Mr. Kiess confirms that it does.

Mayor Erickson asked the Health District to provide an update on Lofall Creek in about six months.

Commissioner Garrido commented that it would be valuable for the Board to hear more about lakes, and lake management districts, especially in relation to the work done at Long Lake. Mr. Kiess agreed and said the Health District does a trophic assessment at lakes to determine their lifecycle, and that Long Lake has been a lake with consistent algae issues. He explained that the Lake Management District will need to monitor the lake but said ongoing funding will be a challenge. Commissioner Garrido also said that a lake management district provides an opportunity for education.

Mayor Wheeler asked if the Long Lake repair project, and chemical treatment, were funded by a grant. Mr. Kiess said it was originally funded by a grant, but he also noted that Kitsap Lake has had similar nutrient issues. He explained that the Health District may use the same method on Kitsap Lake as Long Lake. Mayor Wheeler also asked where the funding for Long Lake's program came from. Commissioner Gelder explained that it had previously been funded by the state capital budget, but said that funding stream no longer exists. Mr. Kiess further explained that property owners now pay into a lake management district to fund monitoring and restoration efforts.

There was no further comment.

#### **SCHOOL TECHNICAL ADVISORY COMMITTEE – STATUS UPDATE**

Mr. Jim Zimny, Environmental Health Assistant Director, provided the Board with an update on the School Technical Advisory Committee.

He reminded the Board that, in July of 2015, the Board's Policy Committee supported Health District recommendations to build and strengthen our School Health and Safety Program to fully comply with WAC 246-366, Primary and Secondary Schools, especially the aspect of the Health District conducting periodic health inspections of public and private K-12 schools (see WAC 246-366-040(2)(b)). The Policy Committee directed the Health District to coordinate this effort through the local school district superintendents.

Mr. Zimny said that, following the recommendations of the Policy Committee, Dr. Turner started including a discussion of the school health inspection requirements during her regular meetings with each superintendent. In the fall of 2017, the Health District reached out to the superintendents of the five local districts and two private schools to recruit representatives to participate on a technical advisory committee stakeholder group. The product of this outreach effort evolved into a School Technical Advisory Committee (STAC) that includes representatives from all five Kitsap school districts and one private school. The goals of the STAC are to examine the state school health and safety rules; determine what inspections may already be routinely performed by other agencies and how these inspections may or may not satisfy parts of the school rules; and to develop a thoughtful, risk-based inspection program that is beneficial to school officials, teachers, and students and meet the intent of the state school rules.

Mr. Zimny explained that the school districts expressed concerns about health inspectors, and fears that they would be shut down, but Dr. Turner and Mr. Zimny assured schools during the first STAC meeting that a school would not be shut down unless it posed an imminent health hazard. He believes that the Health District has developed some partnerships and trust with the school districts through the first couple of meetings so far.

Additionally, Mr. Zimny noted that the Health District was directed by the Board to determine what other inspections were occurring in schools. The Health District found that the only other routine inspections were done by the fire marshal. He also noted that the school districts' risk management pools also did periodic inspections.

Mr. Zimny said the next three STAC meetings will revolve around developing the inspection process. The Health District will conduct the first two years of inspections at no charge, beginning in October of 2018, but will use the trial run to determine what the costs of the program will be.

Mayor Erickson asked if this program will be funded out of the general fund during the first two years. Mr. Zimny confirmed and said the reason for not charging fees for the first two years is because the Health District doesn't yet know how long the inspections will take. He explained that the Health District staff have researched other programs, and their costs, in the state and shared this information with the school districts.

Commissioner Wolfe said he originally had reservations about this program because it might appear to some to be a program to collect extra revenue. However, he said, the Health District's message of safety in schools, has resonated with the school districts, and he sees that this program has created partnerships. Mr. Zimny agreed and said that the Olympic Educational Service District's Workers Compensation team and the risk management pools are on board with this program and asked to join Health District staff on their inspections.

Mayor Erickson asked how the Health District has been reaching out to the numerous private schools in the county. Mr. Zimny said he contacted the two largest private schools to be representatives for the larger group. He said a representative of one of the schools came to the second STAC meeting and had some concerns, but is now supportive of the program. Additionally, that representative offered to reach out to the Northwest Association of Independent Schools and invite them to attend the STAC meetings. He stressed the importance of having their voice at the table while the committee designs the program.

There was no further comment.

## **DISPLAY OF FOOD INSPECTION FORMS – UPDATE**

Mr. Zimny, provided the Board with an update on changes to the food inspection forms and location on the website. He reminded the Board that the Policy Committee had discussed food establishment placarding at a recent meeting. The committee decided not to recommend placarding at this time, but to make food inspection reports more visible and meaningful to the

public. Mr. Zimny showed the Board how to find the food inspection reports on the website, which is now easier to find from the home page. He explained that the comments section has been moved to the top of a report, from the back page, which provides easier access to the findings of the inspection, rather than just the score. Additionally, Mr. Zimny said the Health District is working on an interactive map that will show a user all the food establishments near them with links to their inspection reports. This map will be mobile device-friendly to further facilitate use and access by the general public.

There was no further comment.

## **ADJOURN**

There was no further business; the meeting adjourned at 2:48 p.m.

---

**Becky Erickson**  
**Kitsap Public Health Board**

---

**Keith Grellner**  
**Administrator**

**Board Members Present:** *Mayor* Becky Erickson; *Commissioner* Charlotte Garrido; *Commissioner* Rob Gelder, *Mayor* Kol Medina; *Mayor* Rob Putaansuu, *Mayor* Greg Wheeler, *Commissioner* Ed Wolfe.

**Board Members Absent:** *None.*

**Community Members Present:** Pam Hamon, *League of Women Voters - Kitsap*; Tad Sooter, *Kitsap Sun.*

**Staff Present:** Angie Berger, *Administrative Assistant, Administration*; Karen Bevers, *Communications Coordinator and Public Information Officer*; Kristina Bonsell, *Environmental Health Specialist 1, Water Pollution Identification and Correction*; Yolanda Fong, *Assistant Director, Community Health Division*; Grant Holdcroft, *Program Manager, Pollution Identification and Correction*; Karen Holt, *Program Manager, Human Resources*; Melissa Laird, *Manager, Accounting and Finance*; Anne Moen, *Environmental Health Technician 2, Water Pollution Identification and Correction*; Crystal Nuno, *Environmental Health Specialist 2-RS, Chronic Disease Prevention*; Ian Rork, *Environmental Health Specialist 1, Water Pollution Identification and Correction*; Barbara Sykes, *Intern, Public Health Emergency and Response*; Susan Turner, *Health Officer, Administration*; Jim Zimny, *Assistant Director, Environmental Health Division.*

# MEMO

**To:** Kitsap Public Health Board  
**From:** Katie Eilers, RN, MSN, MPH, Director of Community Health  
**Date:** March 6, 2018  
**Re:** Nurse-Family Partnership Program

Nurse-Family Partnership (NFP) is an evidence-based, community health program that serves low-income women pregnant with their first child. Each new mom is partnered with a registered nurse early in her pregnancy and receives ongoing nurse home visits until her child reaches the age of 2. It is a life-transforming partnership, for the mom and her child. Nurse-Family Partnership helps families — and the communities they live in — become stronger while saving money for state, local and federal governments.

During your meeting today, we will provide an overview of NFP, outcomes of the program to date, plans for the future, and personal reflections about the program from a former NFP client.

NFP's goals are as follows:

1. Improve pregnancy outcomes by helping women engage in good preventive health practices, including thorough prenatal care from their healthcare providers, improving their diets, and reducing their use of cigarettes, alcohol and illegal substances.
2. Improve child health and development by helping parents provide responsible and competent care.
3. Improve the economic self-sufficiency of the family by helping parents develop a vision for their own future, plan future pregnancies, continue their education and find work.

Kitsap Public Health District began implementing NFP in July 2012 as part of a regional team with Jefferson County Public Health.

# MEMO

**To:** Kitsap Public Health Board  
**From:** Jan Brower, BA, MA, RS, Program Manager, Solid and Hazardous Waste  
**Date:** March 6, 2018  
**Re:** Solid and Hazardous Waste Program Overview and Highlights

The Solid & Hazardous Waste Program (SHW) enforces regulations that govern the handling, treatment, storage, transportation, and disposal of solid and hazardous waste in Kitsap County. These regulations include both local Health Board ordinances and Washington State Department of Ecology codes. Additionally, SHW work is included in, and coordinated with, the Kitsap County Comprehensive Solid Waste Management Plan (KCCSWMP), 1999 Edition.

During today's meeting, I will brief the Health Board about SHW work efforts and recent highlights and accomplishments.

A summary of major SHW duties and respective legal mandates/authorities is contained in Attachment 1. A list of links to applicable regulations listed in Attachment 1 are contained at the end of this memo. Attachment 1 also identifies a list of duties that have been temporarily discontinued or reduced due to state funding cuts in mid-2017.

SHW is comprised of a variety of program areas. These program areas include:

- Solid and Hazardous Waste Regulation policies and procedures
  - Secure Medicine Return Regulation (SMR)
  - Solid Waste Complaint Response
  - Homeless response coordination
  - Kitsap Nuisance Abatement Team (KNAT)
- Hazardous Sites and Closed and Abandoned Landfill (39) Management and Oversight
  - Gorst Creek Landfill Restoration Project
- Small Quantity Generator (SQG) Business Assistance Program-
  - Local Source Inspections – 286 business Technical Assistance visits during 2017
  - EnviroStars Business Incentive Program
- Solid Waste Permitting
  - Closed and Operating Landfills (5)
  - SW Handling Facilities (13)
  - Conditionally Exempt Facilities (17)

- Illegal Drug Lab Response, Assessment and Decontamination

SHW also develops various program policies and procedures, factsheets, and brochures. These materials assist the regulated community in complying with the various regulations and provide educational information to the public.

Information about SHW services is available on our website at

<http://kitsappublichealth.org/environment/garbage.php> .

ATTACHMENT 1  
KITSAP PUBLIC HEALTH DISTRICT - SOLID AND HAZRDOUS WASTE PROGRAM ACTIVITIES AND LEGAL MANDATES/AUTHORITIES  
MARCH 6, 2018

Program Activity	Activity Description	RCW	WAC	KPHB Ordinance	KCCSWMP
Solid and Hazardous Waste Complaint Response and Enforcement	Respond, investigate, and abate ~550 complaints/yr including premises violations, illegal dumping, hazardous waste spills, sharps waste dumping, homeless encampment sites, Kitsap Nuisance Abatement Team sites	RCW 70.95	WAC 173-350, 173-304	KPHB Ord. 2010-1	Yes
Respond to and investigate rodent complaints	Enforce rodent control regulations	RCW 70.05, 70.95		KPHB Ord. 1999-14	No
Policy, Procedure, and Regulation Development	Develop and implement solid waste policies, procedures, regulations.	RCW 70.05, 70.95	WAC 173-350, 173-304	KPHB Ord. 2010-1	Yes
Interagency Coordination	This activity consists or coordinating our activities with other agencies with complimentary responsibilities to minimize duplication of effort, improve consistency in the application of standards, and to ensure that other agency actions are conducted in accordance with the requirements. Including but not limited to SWAC, Landuse plan reviews, commercial building clearances (concurrent review with KCDCD), KNAT, MRW Coordinators, Ecology, and Quad County SW group.	RCW 70.95	WAC 173-350	KPHB Ord. 2010-1	Yes
Local Source Control (LSC) Business Technical Assistance	KPHD is delegated authority for enforcement of Small Quantity Generator (SQG) requirements 270/year	RCW 95.105	WAC 173-303	KPHB Ord. 2010-1	Yes
Solid Waste Handling Facility Permitting	Regulate 39 permitted facilities	RCW 70.95	WAC 173-350	KPHB Ord. 2010-1	Yes
Biosolids Inspection and Report Review	6 Generators, 1 Land Application Site	RCW 70.95 J	WAC 173-308	MOU Delegation	No
Conditionally Exempt (CE) SW Facility Inspection and Oversight	Oversee 17 conditionally exempt facilities	RCW 70.95	WAC 173-350	KPHB Ord. 2010-1	Yes
Solid Waste Landfill Permitting	Regulate 4 closed municipal landfills and 1 active landfill	RCW 70.95	WAC 173-351, WAC 173-304, WAC 173-350	KPHB Ord. 2010-1	Yes
Monitor Historic Closed and Abandoned Landfills	40 ± closed and/or abandoned landfills development within 1.000 feet is regulated and subject to KPHD regulations	RCW 70.95	WAC 173-304	KPHB Ord. 2010-1	Yes
Illegal Drug Lab Response, Enforcement and Clean-up	Consists of posting illegal drug labs, overseeing decontamination and billing owners for costs.	RCW 64.44	WAC 246-205	KPHB Ord. 2005-7	No
Biomedical Waste Regulation Enforcement	Respond to complaints of imrproper handling and provide infromation to the regulated community	RCW 70.95K	WAC 480.70.426	KPHB Ord. 2010-1	Yes
Secure Medicine Return Regulation	require Pharmaceutical manufacturers to provide for the safe and legal collection and disposal of unused/waste medicines. Oversee plan implementation.	Proposed	Proposed	KPHD Ord 2016-2	Yes
Illicit Sharps Dumping Response	Respond immediately to reports of sharps dumped in the community	RCW 70.95K	WAC 480.70.426	KPHB Ord. 2010-1	Yes
Public Records Request	Respond to all public records request as required by law.	RCW 42.56	Case Law		No
Blood Lead Level (BLL) Investigations	A reportable condition for which response is required under certain circumstances	RCW 26.44.030	WAC 246.101		No
School Inspection Program	KPHD is currently working with schools to develop and implement a school inspection program in accordance with the law. Tnhis program will be performed by SHW staff and will consist of 0.25-0.5 FTE.	RCW 43.20	WAC 246-366		No
<b>Activites Temporarily Discontinued in 2017-2018 Due to State Funding Cuts</b>					
Initial Investigations and Site Hazard Assessment Reporting (may be permanently discontinued)	Reporting for IIs and SHAs in accordance with Ecology guidelines and regulations. Investigations of spills and overseeing site clean-ups continue with no funding.	RCW 70.105D	Wac 173-340		No
Low-Risk Illegal Dumping Investigation and Enforcement	Approximately 90/year are now referred directly to Kitsap County litter Clean-up Road Crew, with no ID investigations or enforcement	RCW 70.95	WAC 173-350	KPHB Ord. 2010-1	Yes

ATTACHMENT 1  
 KITSAP PUBLIC HEALTH DISTRICT - SOLID AND HAZRDOUS WASTE PROGRAM ACTIVITIES AND LEGAL MANDATES/AUTHORITIES  
 MARCH 6, 2018

Homeless Encampment Clean-up Response Coordination	Coordination discontinued except providing supplies and safety tailgates training for clean-up volunteers	RCW 70.95	WAC 173-350	KPHB Ord. 2010-1	Yes
KNAT Coordination	Activites are minimized to the extent possible, which works for short-term because DCD is just getting up to capacity on KNAT	RCW 70.95	WAC 173-350	KPHB Ord. 2010-1	Yes
Triage Complaints	Respond to more significant first, decline to respond to dumpster dumping, landlod tenant disputes and rodent complaints without SW component. Overall reduction in complaints by 50-75/year	RCW 70.95	WAC 173-350	KPHB Ord. 2010-1	Yes
